

Case Log for the Certificate of Small Animal Veterinary Practice / Dentistry

Case log explanations and instructions:

100 patients are required.

Clinical Category

One patient may undergo several clinical categories. Each category needs to be filled in as a case separately. Example: cat with gingivitis, fractured 104 and 307 308 affected by TR2 underwent: prophylactic procedure, endodontic treatment of 104 and crown amputation of 307 308. Each of these 3 categories needs to be logged and described separately.

1. **OS** Oral surgery which includes: nonsurgical extractions and crown amputations, surgical extractions, oral fracture repair, major oral surgeries and soft tissue surgery
2. **PE** Periodontology with: COHAT, Subgingival debridement, Pocket reduction (gingivectomy, gingivoplasty), Surgical periodontology: flaps, GTR
3. **EN** Endodontics with Conventional endodontics, Vital pulp therapy and surgical endodontics, Restoration performed after endodontic treatment is a part of endodontic procedure
4. **OR** Orthodontics: Orthodontic consultation, Interceptive orthodontics, Passive and Active orthodontic treatment
5. **RE** Restorations and Prosthodontics that include dentinal bonding, restorations and prosthetic treatment
6. **OM** Oral medicine: extended imaging diagnostics, treatment plan, in vitro procedures, tests

In the case log the following rates of categories are required:

OS-45% with maximum half of simple extractions and crown amputations

PE-35% with maximum half of COHAT

EN-5% with at least half being a standard endodontic procedure

RE-5%

OM-5%

OR-5% with maximum half of orthodontic consultations

Patient: needs to have name of the animal and surname of the owner (the latter non mandatory due to personal data protection)

Species: Dog, Cat

Age: expressed in years and months

Primary complaint: highlighting main reason for coming to surgery or major findings which made recommendation for dental procedure. It also can be referral case with main request from referring veterinarian

Diagnosis: must include all relevant dental findings after clinical and radiographic examination (if applicable) with the use of abbreviations (Appendix 1)

Dental Procedures: must include all performed dental procedures adequate to diagnosis column. if a part of problems postponed or declined - please note this.

Follow-up: note the time after the procedure you did the recheck exam and findings, for endodontic treatment - 6 months follow up are required

Example how to log cases/categories:

Case #	Clinical Cat.	Patient	Species/breed	Age	Primary Complaint	Diagnosis	Dental Procedure	Follow up
1	OS	Chelsea Smith FS,	Dog/boxer	6yrs 8 months	bad breath,	PD3 109, 110/ 310	XSS 109 XS 110, 310	
2	EN	Chelsea Smith FS,	Dog/boxer	6yrs 8 months	pain on retrieving	CCF 304	RC 304	
3	RE	Marcel Jackson	Cat/British shorthaired	4 yrs	oral mass	Granuloma - MAL/1 traumatic relations of 108/409	odontoplasty of 108, dentinal bonding	6 weeks re-check: recurrence of granuloma - recommended extraction of 108

The case log needs to be compiled as an Excel file using the template in the appendix.

Upon submission of your completed log, the evaluator will request the detailed documentation of **6 select cases**. Please provide the documentation shortly after being prompted as follows:

1. Provide each case in **PDF format in reduced file size** (15–20 MB for all should be maximum)
2. Format each case like a **small presentation** with inclusion of the **dental chart**, relevant **photographs** and **radiographs**, which justify the content of the case log.
